

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

NOTES AND NEWS.

GEORGE ERNEST SHELLY, a Corresponding Fellow of the American Ornithologists' Union, died in London, November 29, 1910. A notice of his life and works will be given in a later number of this journal.

IN THE biographical notice of Manly Hardy, published in the January number of this journal (*Auk*, XXVIII, 1911, p. 150), he is said to have been elected an Associate Member of the American Ornithologists' Union at its first meeting held in 1883, and that "he retained this membership till 1901." By an unfortunate inadvertence the important fact that he was then transferred to the newly established class of Members was not mentioned. He was not only one of the first to be elected to this class, but remained an honored member of it till his decease.

THE Audubon Society of the State of New York held its Fourteenth Annual Meeting at the American Museum of Natural History, March 16, 1911. In the absence of the President of the Society, Prof. Henry Fairfield Osborn, Dr. F. A. Lucas presided. The report of the Secretary-Treasurer, Miss Emma H. Lockwood, showed that the past year had been one of unusual activity in the prosecution of its work. Mr. T. Gilbert Pearson, Secretary of the National Association of Audubon Societies, presented a report on current legislation, with particular reference to bills to amend the present bird laws now before the New York Legislature, in order to make the present laws less efficient in behalf of the millinery interests, market hunters, and cold-storage dealers in game. Mr. Herbert K. Job gave an illustrated address on 'Bird Hunting with a Camera.'

THE National Association of Audubon Societies, having found its old quarters at 141 Broadway, New York City, too cramped for its activities, has moved further up town, having taken rooms at 1974 Broadway, near the corner of 67th Street. Here much more commodious rooms have been secured at less cost, and at a point convenient of access from any part of the city. Correspondents of the National Association and intending visitors to its headquarters should carefully make note of the change of address to **1974 Broadway**, near the subway and elevated railway stations at 66th Street and Broadway, New York City.

MR. FRANK M. CHAPMAN, curator of birds at the American Museum of Natural History, sailed from New York on March 13 for several months of field work in western Colombia, in the interest of the American Museum.
